Front Page
- Account — for Registering our device? Saving / Sharing recipes. Saving standard equipment configuration (In-line heater? BIAB, Mash Tun, Grain basket etc)
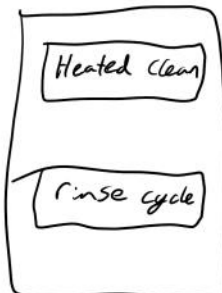

- Settings — metric / Imperial? a lot of recipies are in imperial so would be cool if we could just
  - Text display size?

— Some shiz like this maybe

Clean

- Ability to configure timings, temps pause points, notifications etc
- Maybe an "auto" clean for easy use no need to configure yourself
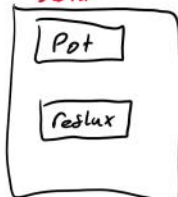

Recipe

— will have a large decision tree associated with this one. Temps, ph, flow rates & timing for each stage of the brewing process

— Saved recipes with ability to edit

— Search online database of other users recipes (probably keep this "Theorhetical" as could be very complex to do?

Distil

— Select still option
 ↳ Select "Default" saved equipment configuration or edit for non-standard setup
  ↳ Select recipe to distil? maybe just option to add stages with timings, temps & flow rate?
  ↳ Start
  ↳ User prompts when required

Brew

↳ User prompts when required

Brew

Equipment Config

User Default

Custom

- Match app settings with physical config of brew equipment

↳ Select recipe

↳ edit recipe to meet equipment setup... (eg if using BIAB ∴ no sparge) Scale button? found a 50L recipe but only want to brew 20L? have the app auto-scale all volumes/weights by correct ratio

↳ Start

↳ User prompts when required
